Gary,

I am sending you a compilation of my original Final BHHRA comments, which I first submitted to you on 2/16/10, and the EPA contractor comments that I think are valid. Correction of these issues is unlikely to change the BHHRA conclusion that human health risks at the site are acceptable, based on the deed restrictions placed on the property. But they will place the conclusion in the appropriate regulatory context. Since you sent me the EPA contractor comments on 2/22/10 after 3:00 PM, I am able to send you the combined comments now. Please let me know if there is anything else I can do or if you have questions regarding the comments. Also, I know you are expecting the TCEQ comments some time. Do you have an idea when this will be? Would you like me to talk to TCEQ regarding their comments or wait until they send them to you?

Thanks
Dipanjana
